

Microsoft RMS Android Inventory App

System Solutions, LLC.

Microsoft RMS Android Inventory performs:

Mobile Physical Inventory

- Mobile physical inventory counting and re-counting
- Real time item validation and physical inventory transaction updating
- Update existing physical inventory transactions or create new
- Automatically adds to existing counts when same item is counted in multiple locations in the store
- Submit Android physical inventory counts to Microsoft RMS for calculate, print, recount or commit

Mobile Purchase Order

- Create new purchase order or update existing purchase order
- Real time item validation
- Submit Android purchase order to Microsoft RMS for transmission to supplier

Mobile Receiving

- Verify and update quantities received
- Submit Android purchase order receipt to Microsoft RMS for commit

Mobile Label Printing

- Print labels using any Microsoft RMS created label format
- Uses RT Label (sold separately) to automatically print labels to label printer or label printing queue

System Requirements
