

Lumber Manager

System Solutions Lumber Manager for Microsoft RMS assists with lumber pricing and inventory tracking.

- Convert your cost off of the suppliers cost
- Adjust the dimensions properties of each lumber item
- Updates the cost per piece from supplier cost from cost per thousand board feet (mbf)
- Track cost for each different item supplier for any item
- Sell in Linear Feet, by the piece or thousand board foot
- Calculated cost can be marked up by a percent margin
- Round up price to end in a set number, for example nine
- Update the length and cross sectional area of each lumber item
- Maintain a real time inventory in units and board feet on hand
