

RMS Ingenico Advertising and Customer Controls

Give your Microsoft RMS and Ingenico signature capture installation the same signature capture functions as the “big box” stores! System Solutions RMS Ingenico Advertising and Customer Controls Add On adds marketing capability and check-out efficiency to any Microsoft RMS / Ingenico installation.

The Ingenico signature capture can display

- Custom images
- Messages
- Running total
- Total and other transaction details

Transaction Cycle is Made up of 5 Standard Screen Forms

- (1) Static form displays your logo during POS inactivity
- (2) Card type form lets customer select Debit or Credit
- (3) Form prompts user to swipe card
- (4) Signature Form with signature box
- (5) Final Form displays your logo and a message

Desired text and images for 1, 4, and 5 must be received at time of order. Text changes are included if received at time of order (subject to display area limitations).

Custom static form packs (Combination mix of 3 different screens of type 1, 4, or 5 above) are available for an additional cost.

Custom programmed form packs (Combination mix of 3 different screens of type 2 or 3 above) are available for an additional cost.

System Requirements

Ingenico Advertising and Customer Controls requires the following: Microsoft RMS version 2.0, .Net 2.0, SQL 2005 or later, Windows XP Pro (SP 2), Vista or Windows 7.

Signature Capture Hardware requirements: i6550, i6580, i6780 or enTouch1000. Color images only available with certain models.
