

## Security Integration

Integrate Microsoft RMS with a customers security system to create a complete record of all transactions. Security Integration from System Solutions stores a picture with transaction details. The record can be recalled at anytime for review.

The screenshot displays a software interface for reviewing security footage. On the left, a video window shows a cashier in a blue uniform operating a register. Below the video, a status bar reads "Paused : 763 / 1337 -- 4/6/2005 1:45:24 PM". A control bar includes a play/pause button, a seek bar, and a "Camera: Reg1" dropdown menu. On the right, a table lists transaction details.
